

# GIS for Science Research and Education in Kuwait

SuperGIS Desktop 3 Lab Kit and GIS Learning CD, developed by SuperGeo, have been selected by the College of Science, Kuwait University, to establish a GIS platform that serves as a tool for conducting science-related research and improving the teaching quality.

Kuwait University is the country's only university with 16 colleges, including Law, Science, Art, Education and Engineering. To provide future generations with access to higher education and empower them with sufficient scientific knowledge to fulfil local workforce demands, the university is continuously upgrading its equipment and striving for research excellence.

Featuring abundant GIS tools, SuperGIS Desktop 3 makes it easy to integrate, analyse and induce massive spatial and attribute data, encouraging the flexibility of data utilisation while implementing the educational programmes of science research.

Being the leading provider of GIS software and solutions, SuperGeo has cooperated with the exclusive reseller, International Integrated Environmental Services Ltd. (IIES) in Kuwait, to provide education institutes with GIS training services to increase their ability of using GIS mapping software and to facilitate the exchanges between educators and learners.
