

# GIS Software Download Finder

From now on, GIM International is your guide for GIS software. On this website, you find a guide to GIS software that is available to download for free. You find it in the link 'Downloads' in the left hand navigation bar of the website.

Mostly, the software is leading to free viewers, trial versions or open-source software. Have a look at the guide yourself and see what software is available.

As software is developing fast and we - however we tried hard to find the right applications - realise we did not yet include all software available. Please submit your suggestions and comments to our content manager, Joost Boers, e-mail [joosb@reedbusiness.nl](mailto:joosb@reedbusiness.nl), and contribute to improve this section!

of GIM International.
