

# Global Population Database

EVC has made available the LandScan Global Population Database to the European market. Published by the US Department of Energy's Oak Ridge National Laboratory, this database is developed for population study and was made with GIS users in mind.

Comprised of a worldwide population database compiled on a 30" x 30" latitude/longitude grid, the dataset covers the entire globe excluding Antarctica and is updated for annual release. Included in the database are a robust set of metadata, documentation, and user guides to help you get the most out of this unique and comprehensive tool.
