GML Days 2005

Galdos Systems Inc. will host the GML Days 2005 held from 18th -22nd July in Vancouver, Canada. GML Days 2005 is the fourth annual conference on the OGC Geography Markup Language (GML) and Web Services for GIS. GML is rapidly emerging as the world standard for the XML encoding of geographic information and is the foundation for the Geo-Web. GML is being applied to a wide range of geographic applications including homeland security & critical infrastructure protection, integrated land and resource management, location-based services, telematics and intelligent transportation systems, and oceanography.

The final list of papers has not yet been determined so there still is time to submit an abstract for consideration before 27th May 2005.
Send your abstract to: papers@gmldays.com. Abstracts should be a maximum of 200 words.
For more information on GML Days or to register, please go to www.gmldays.com. Early registration ends on 3 June 2005.
