GO! Sync for ArcPad

Tadpole-Cartesia (CA, USA) has launched GO! Sync for ArcPad, a new add-on for ESRI's ArcPad using ArcGIS 9.0 technology, with support for ArcGIS 8.X included. The software automates the process of synchronising new data between ArcSDE or Personal Geodatabases and shapefiles stored on handheld devices when docked or on-line. It is a seamless extension to ArcGIS. Tadpole-Cartesia will sell the system directly to the ESRI worldwide customer base.
