Hitachi Software/Pictometry Accord

Hitachi Software Global Technology (CO, USA) and Pictometry (NY, USA) have signed an agreement under the terms of which Hitachi Software has modified its HouseDiff change-detection software to use Pictometry imagery and Pictometry has integrated the resulting change files into its Change Analysis software. Pictometry will now be able to market HouseDiff. Pictometry software enables accessing several high-resolution images of a same area and taking measurements directly from georeferenced imagery. It also can insert GIS content and other data.
