

# Hong Kong University Empowers GIS Analyst with SuperGIS Desktop

Supergeo Technologies has announced that Hong Kong Polytechnic University (HKPU) has selected SuperGIS Desktop through Star Vision, Supergeo-certified reseller, to educate its students in utilising GIS technologies and empower GIS analyses. HKPU is one of the most reputed universities in Asia. Its department of Land Surveying and Geo-Informatics has been devoted to training and supporting qualified young people and professors with the latest geospatial knowledge to help academia and industry for over 30 years.

The experienced department has selected SuperGIS Desktop to assist them in practical and advanced spatial analysis to fulfil professional needs. SuperGIS Desktop can help users to edit, analyse, display, query, manage and visualise geospatial data, so that the researchers can have reliable and accurate analysis results for academic uses.

SuperGIS Desktop has been chosen by worldwide academic institutions for educating and supporting GIS experts. With abundant online guiding resources and outstanding local technical service, users can easily learn useful tips to enhance their professional demands.

To assist GIS education, Supergeo provides free licences for students who are then able to acquire SuperGIS Desktop software for further efficient GIS learning with no costs.

Learn more about a free licence for students [here](#).
