

How-to Guide Geospatial Infrastructures

World Bank personnel are hosting a workshop at GSDI12 in Singapore in October that will explore the need for a pragmatic How-to Guide. The proposed guide would explicitly address the needs of developing countries in implementing and maintaining spatial data infrastructure at the sub-national and national levels. As input to the workshop, they would like to have your responses to a short survey.

The [short ten-question survey](#) should take less than ten minutes to complete for the typical respondent. Responses will remain anonymous unless you desire make your identity and contact information available to World Bank staff.
