

# IGI to Sponsor GIM International 3D Modelling and Visualization Weeks

IGI, manufacturer of mobile mapping systems, aerial cameras and other turn-key geospatial solutions, has become official sponsor of the 3D Modelling and Visualization Weeks organized by 'GIM International'. The online event will consist of a dedicated web page, extra newsletters and the bumper-packed September-October issue of 'GIM International', the global magazine for the

geospatial industry.

During the [3D Modelling and Visualization Weeks](#) (21 September-23 October), which will be supported by an abundance of new articles, columns, Q&As, videos and other new content, the *GIM International* community will get a major update on what's going on in the geospatial industry. The event will highlight all the solutions that are involved in turning geodata into a finished geospatial product – with a special focus on the latest ways to process and visualize the data. This makes it the ideal time for suppliers to put their relevant solutions in the spotlight.

For more details of how to ensure your company and geospatial solutions take centre stage during the 3D Modelling and Visualization Weeks, contact Jurjen Visser ([jurjen.visser@geomares.nl](mailto:jurjen.visser@geomares.nl)) or Feline van Hettema ([feline.van.hettema@geomares.nl](mailto:feline.van.hettema@geomares.nl)). And if you have any suggestions about interesting topics for articles or columns, please send them to Wim van Wegen ([wim.van.wegen@geomares.nl](mailto:wim.van.wegen@geomares.nl)).
