

Illuminated Survey Target

Omni Optical Products, Inc. (CA, USA) has introduced their new series of illuminated survey target, the Omni's 4700 Series Illuminated Target. The target utilises the same backlight technology as in today's notebook computers and is powered by lithium batteries. The target can be used as a standard target during the day, and can be illuminated for use in dark environments. Applications for use include; traffic accident and crime scene investigation, mining, tunnel and monitoring, in adverse weather and in dense forest or foliage.
