

Intergraph ImageStation PixelPipe

Intergraph Corporation (AL, USA) released ImageStation PixelPipe, an integrated solution for enterprise orthophoto production designed. PixelPipe provides a single seamless solution, from one vendor, for all aspects of orthophoto production, including image and metadata management, intelligent distributed processing, rigorous quality assurance/quality control processes and automation.

Building on the powerful tools available in Intergraph's earth imaging solutions, including TerraShare, ImageStation OrthoPro and ImageStation PixelQue, the entire ortho workflow can be achieved in a distributed processing environment.
