

Intermap Awarded Funding Support for R&D

Intermap Technologies (CO, USA) has announced that the Canadian Government's National Research Council-Industrial Research Assistance Program (NRC-IRAP) has awarded Intermap a contribution of US\$ 454,000 for further research and development of the Company's X and P-Band radar technology, which is utilised for digitally mapping 3-dimensional images of the earth's surface. The IRAP contribution will be used to conduct R&D activities related to Intermap's innovative airborne data acquisition, processing and analysis methods and algorithms.

The National Research Council-Industrial Research Assistance Program (NRC-IRAP) is a Canadian assistance program for Small and Medium-sized Enterprises (SMEs). NRC-IRAP's mandate - to stimulate wealth creation for Canada through technological innovation - is largely accomplished by providing technology assistance to SMEs at all stages of the innovation process, to build their innovation capacity. NRC-IRAP helps SMEs understand the technology issues and opportunities and provides linkages to the best expertise in Canada.
