

International Presentation of SuperGIS Software

SuperGeo Technologies attended several GIS events globally this month to demonstrate the latest SuperGIS software and applications.

First of all, SuperGeo team went to Istanbul, Turkey, for Intergeo East. Located in Turkey where connects both Europe and Asia, Intergeo East attracted numerous visitors from neighbour countries in Europe, Middle East, and Asia. Many companies visited the SuperGeo booth to learn about the latest GIS technologies and SuperGIS products, and also inquire the opportunity to be SuperGeo distributors.

In Taiwan, SuperGeo team joined in IEEE 71st Vehicular Technology Conference as well as the 7th Taipei International Digital Earth Symposium, both in Taipei, Taiwan. The first

event discussed the techniques and products regarding transportation, so SuperGeo team especially showcased SuperGIS Network Server and several success stories in transportation, route analysis, and real time traffic information.

For the latter event, several researchers from overseas universities and research institutes are invited to present their studies in global change and sustainable environment by means of GIS technologies. SuperGeo also introduced applications and products which can contribute to the related domains, and attracted numerous users for in depth discussion.
