

# ION Pacific PNT 2013

## Programme and Registration

Registration is now open for the Institute of Navigation (ION) Pacific PNT 2013, which will be held from 22 to 25 April 2013 in Honolulu, Hawaii. The event will feature technical papers presented on a diverse array of topics including image aided and terrain-referenced navigation, terrestrial and maritime navigation technologies and earthquake, tsunami prediction and monitoring with GNSS.

Pacific PNT brings together policy and technical leaders from Japan, Singapore, China, South Korea, Australia, USA and more for policy updates, program status and technical exchange.

This year's theme, Global Cooperative Interoperability, will frame the technical programme. Leaders representing academia, government, industry and the scientific community will convene to solve PNT challenges that impact Pacific Rim development.

Pacific PNT 2013 is organised by a prestigious Pacific Rim Advisory Board.
