

Iranian Meeting on Mining

Higher officials from Iran Ministry of Industry and Mines, and from all its 30 provincial directorates were able to learn about Netcad mining solutions in the seminar held in Tehran. In the seminar the Ore Body Modeling and Mine Planning Engineering solution NETPRO/Mine and NETGIS|Server platform based Geospatial Mining License Information System solutions are presented.

The event was interactive and the attendees highly appreciated the solutions. After the event the higher officials of the ministry mentioned that the presented solutions fits all the requirements of their organization, and even they present more than the expectations.

Iran Ministry of Industry and Mines aimed to have all its central and provincial organizations benefit from high technology Geospatial Information Systems within the year 2010. Besides supplying developable and comprehensive solutions with international standards, valuable training and technical support services and localization abilities puts netcad forward to Iran Mining Industry just as the other markets in the region.
