

ITM 2011 Call for Papers

Abstract submissions are now being accepted for The Institute of Navigation's (ION) International Technical Meeting (ITM) to be held 24th to 26th January 2011 at the Catamaran Resort Hotel, San Diego, USA. This year's plenary session, Robotics Navigation, features a series of invited talks on autonomous robotics navigation, including current trend and future technologies that support navigation for surveillance, search and rescue, underground and underwater robotics, and unmanned air vehicles.

ITM 2011 features more than 150 technical papers presented on a diverse array of topics. Abstracts are being accepted through 4th October 2010.
