

Join the geospatial conversation: contribute to GIM International

Calling all geospatial professionals! You've no doubt been involved in inspiring projects and applications that leverage innovative reality capture methods and advanced technologies. In the spirit of knowledge exchange, why not consider sharing your own insights with *GIM International's* global audience of mapping and surveying specialists?

It goes without saying that *GIM International* boasts a talented global team of contributing editors at the forefront of the geomatics industry. Nevertheless, in such a dynamic sector, we recognize that there are numerous other captivating ideas and use cases out there. If you are willing to share your experience with your peers in the geospatial community, we invite you to contribute an article.

To explore the possibilities, please reach out to Wim van Wegen, head of content at *GIM International*. You can contact him by [sending an email](#) with a brief summary of the idea you'd like to share with other mapping and surveying professionals.
