

Juniper Systemsâ€™™ Mesa 2 Rugged Tablet Featured at GEO Business

[Juniper Systems Limited](#), manufacturer of ultra-rugged field data collection solutions, recently announced the release of its latest product, the [Mesa 2 Rugged Tablet](#) running on the Android operating system. This handheld computer provides a superior solution for those seeking the versatility of Android with the Mesa 2's renowned durability and precision.

On 23 and 24 May, the Mesa 2 was showcased at the [GEO Business](#) in London. Visitors could see, touch and feel the Mesa 2, along with the full spectrum of Juniper Systems' rugged products.

The Mesa 2 with Android was developed to provide an alternate operating system option for customers seeking the reliability of the Mesa 2, with the added versatility and familiarity of Android, said Simon Bowe, general manager of Juniper Systems. Both the Mesa 2 with Android and the Mesa 2 with Microsoft Windows 10 are built with the same IP68 waterproof and dustproof rating, long-lasting battery life, and 7-inch display. With the product's design Juniper aims to strike the perfect balance between an ample viewing area and reduced overall weight for minimal fatigue, and all-day comfort.

The Mesa 2 also offers optional features and accessories, including a Class I Division 2 classification that ensures safety in explosive environments, a 1D/2D barcode scanner, a pistol grip barcode scanner, and RFID readers, among others. These options are provided to ensure customisation, increased productivity, and efficiency.
