

# Kolida Goes Worldwide

Guangdong Kolida Instruments Co., Ltd. (Kolida), a manufacturer of surveying products from China, has announced that it is operating international. Kolida specialises in designing, manufacturing, distributing, and servicing of surveying instruments.

The corporation headquarter is located in Guangdong, China, and has several subordinate plants. The main products include total station, electronic theodolite, auto level, accessories, etc. Besides, it has developed its own surveying and GIS software. In their domestic market over 100 distributors form Kolida's distribution network. In 2004 they sold 1,300 total stations, 5,000 digital theodolites, 5,000 auto levels and 1,000,000 accessories in there domestic market.

With the R&D team of over 50 members, Kolida supplies practical and convenient surveying instruments for the field of engineering and surveying. It delivers the first absolute-encoding total station in China.

In 2005, Kolida is looking for distributors all over the world. The technical training course, free and practical for the authorised dealers, is available all the year round.
