

L1 OEMStar Precision Receiver

NovAtel has presented their L1 OEMStar 14-channel GNSS receiver at the ION 2009 tradeshow in Savannah (GA, USA). The low cost, 14 channel, L1 OEMStar is only 46mm by 71mm in size and consumes 750mW of power when tracking both GPS and GLONASS signals.

The company plans to start shipping the OEMStar to customers in November, 2009.
