

# Laser Data and Modelling User Conference

The LFM User Meeting Europe 2011 will be held on Thursday 10th November at the World Forum, The Hague (The Netherlands). This follows on directly from the SPAR Europe conference which is being held there on 8th and 9th November 2011, and where mother company AVEVA is to showcase its laser data products, which now include the recently acquired LFM Software suite.

The User Meeting offers both existing and new users the chance to gain an insight into best practices with LFM software and learn about the innovative new features of the latest release of LFM software as well as the future plans of AVEVA in the Laser Scanning domain.
