Leica GI Releases RedSpider Enterprise 3.5.2

Leica Geosystems Geospatial Imaging (GA, USA) has released RedSpider Enterprise 3.5.2. With numerous enhancements, RedSpider Enterprise has increased its compliance with the Open Geospatial Consortium and International Organization for Standardization (OGC/ISO) standards.

RedSpider Enterprise 3.5.2 empowers users to build customised geospatial web applications. With an enhanced user interface, organisations may easily create more intuitive and versatile applications. In addition, new security features provide seamless protection for business applications.

In 2007, Leica Geosystems acquired IONIC and their RedSpider Suite. A vital component of Leica Geosystems' portfolio of enterprise solutions, the RedSpider Suite's continued development affirms the company's commitment to deliver solutions with open standards-based interoperability.
