

LP360 V1.2, a Lidar Extension for ArcGIS

QCoherent Software LLC (CO, USA) has released the LP360 version 1.2, Lidar extension for the ESRI ArcGIS environment. LP360 employs a specially-designed ArcMap data layer to access and draw Lidar points directly from LAS files. The architecture of LP360 supports big quantities of point cloud data. LP360 facilitates the integration of LIDAR point cloud data with other GIS data types supported by ArcGIS. To install LP360 you require a standard ArcView license.
