

Management Change at Hemisphere GNSS

Hemisphere GNSS has announced that Xinping Guo has been named interim president and chief executive officer, effective immediately. Mr Guo is also a member of the Hemisphere GNSS board of directors. He has extensive experience in GNSS OEM and direct sales market segments including survey and mapping, GIS, machine control, marine, avionics, personal (mobile) navigation and tracking systems.

Mr Guo is chairman and general manager of Beijing UniStrong Science & Technology which owns 100% of Hemisphere GNSS. He is an executive with the experience and expertise to lead Hemisphere as it conducts an executive search for a new president and chief executive officer to lead the company's future growth and development.

In conjunction with the reported change in management, Hemisphere is also announcing the departure of Charles Joseph, the company's previous president and CEO. Werner Gartner, Hemisphere's chairman of the Board, commented, Joseph was instrumental to the ongoing development of the company since joining Hemisphere in early 2014, including the creation and launch of Athena GNSS engine and Atlas GNSS global correction service.
