

Mapping and 3D Modelling in Medina

The city of Medina in the Kingdom of Saudi Arabia is realising base maps and 3D modelling. In order to provide the necessary services, Blom CGR, the Italian subsidiary of Blom ASA, has partnered with Unicom from Saudi Arabia to secure this contract with the Development Commission of Medina (DCOM).

Blom's capture technologies will produce accurate and high-resolution data; the deliverables consist of Lidar, aerial photo and BlomOBLIQUE. Blom's data will form a unique geospatial base in DCOMs sophisticated database sharing service, providing an encompassing solution.

Blom's share of the contract is NOK8 million. The contract will be completed within the 4th quarter of 2012.
