

Maptek I-Site Technology and the Indian Mining Market

Maptek has announced the first sale of its award-winning I-Site scanning technology into the dynamic Indian mining market. Maptek provides easy-to-use high technology surveying solutions with industrial site safety in mind. I-Site 4400 scanners combine a 3D laser imaging instrument with panoramic, high resolution digital photography for measuring large scenes accurately.

Gulf Oil, headquartered in Hyderabad, is a large diverse group with industrial lubricants, industrial explosives and speciality chemicals. Gulf Oil also undertakes contracts for complete mining operations and civil constructions under IDLconsult Division. Currently Gulf Oil is the largest mining contractor in India and has been doing its homework on laser scanning technology over several months.
