

MARS FreeView Free Downloadable

Merrick & Company (CO, USA) has released the free downloadable MARS FreeView, an intuitive, easy-to-use viewing application for Lidar, high-resolution imagery and GIS datasets.

Merrick Advanced Remote Sensing (MARS) software is developed and sold by Merrick &

Company, a full-service engineering firm headquartered in Aurora, Colorado. MARS is a production quality Windows application specifically designed for processing, analysing and managing terrain data.

MARS provides unparalleled application and visualisation performance for massive LiDAR datasets and includes a modular tool suite that is used to manage field collection, data analysis, quality assurance, production, and client deliverable workflows.
