

MDL Awards Ads Western Data Systems as Distributor

Measurement Devices Ltd (MDL) has awarded the Handheld Laser Products U.S. Master Distributorship to Western Data Systems of Houston, Texas. Western Data Systems will establish a nationwide dealer network to expand the market reach of the MDL hand held products across the United States.

These eye-safe handheld laser systems are currently utilised for surveying, measurement, and positioning in such fields as Mining, Forestry, Survey, and Construction. Western Data Systems sales infrastructure in the U.S, will give the MDL products an accelerated market expansion in a rapidly growing market.

The Handheld Laser Systems line includes eight existing products, and mid 2008 MDL will be introducing a new hand held LaserAce with an internal digital compass. The other products are the LaserAce 300, ForestAce, LaserAce Hypsometer, LaserAce Survey, LaserAce GIS Pole, LaserAce Burden Finder, BurdenAce and the LaserAce Encoder.

Western Data Systems is Survey Equipment Rental and Sales Headquarters. They represent, sell, service, and train users on equipment and tools available to the market today, from such manufacturers as; Trimble, Nikon, and Spectra.
