

MiTAC Extends Relationship with Tele Atlas

Tele Atlas (Netherlands) and MiTAC International (Taiwan) have announced that MiTAC navigation solution subsidiaries Mio and Navman have extended their agreements to use Tele Atlas digital maps and content for each brand's complete range of personal navigation devices and products. The agreement covers a three year period and marks an extension of the companies' current partnerships, which began in 2005.

Through the agreement, Mio and Navman products will be able to leverage Tele Atlas' full line of digital map content and products, including navigable map data for 74 countries, Tele Atlas 3D Landmarks, Tele Atlas Digital Elevation Model, Tele Atlas Safety Cameras, content for nearly 30 millions of points of interest (POIs) and additional map content products, through 2011.
