

Netcad Meets Cadastre Representatives

A high officer from the central office in Dushanbe and regional directorates from Khujand, Kulyaba, Reshd, Gorno Badakhshan, State Geodetic Oversight and Finnmap Turkey and Tajikistan representatives attended to the Netcad Cadastre Solutions workshop in Ankara. The attendees meet with the comprehensive approach and solutions of Netcad for cadastre system from data acquisition to registry and management.

On the first day of the program the delegate visited Turkish General Directorate of Land Registry and Cadastre to see the TAKBIS (Land Registry and Cadastre Information System) and Netcad solutions running in the central and regional cadastre offices. On the second day of the program, the delegate attended to a Netcad Cadastre solutions Seminar and Workshop held in the headquarters of Netcad. After the seminar and workshop the

delegate visited the offices and had small talk with the employees.

During the lunch in honour of the delegate, the director of the Tajikistan State Geodetic Oversight Mr. Dildor Toshbekov made a speech mentioning the efficiency of the program and presented his appreciation to Netcad for supplying such complete and valuable cadastral solutions with high technology developed by its local resources.
