# New Asian Pointools Partner

Linkfast Technology of Taiwan has joined the Pointools Partner Programme in Asia. Pointools software is used by project teams to reference and reuse the largest point-cloud models in the broadest range of applications for streamlining scan-to-model workflows.

Michael Lee, sales director of Linkfast, says that Pointools software offerings perfectly complement Linkfast's 3D scanning solutions from Riegl and Topcon, enabling scan data reuse across a broad range of software apps. Pointools offerings include stand-alone applications, CAD software plug-ins, and a third-party development platform for point-cloud processing and visualisation; uniquely enabling point-cloud model reuse across Bentley, Autodesk, Safe Software, Rhino, and SketchUp applications without time-consuming translation.
