New, Free Plug-ins for XML-based Data

Cadcorp (UK) is offering three new plug-ins for XML-based data for use with its Cadcorp SIS-Spatial Information System software suite.

The GeoRSS, GPX and MIDAS plug-ins are part of V6.3 of Cadcorp SIS, which is due for release later this year but are fully compatible with the current V6.2 release. They new plug-ins will be available for free download from the Cadcorp website.

The next service pack release of Cadcorp SIS V6.2 will include a version of the free Map Browser product that will be able to use the GeoRSS plug-in. This will enable Map Browser users to load GeoRSS 'feeds' and to combine them with Open Geospatial Consortium, Inc. (OGC) W*S services.
