

# New Frontier City Mapping

Discovering cities and their surroundings in the most realistic way possible is becoming the next frontier of online mapping services. Photorealistic 3D cities from C3Technologies are made available on Ovi Maps, Nokia's free mapping and location service.

The first release includes twenty major cities around the world as well as 3D street views for some European cities, including Copenhagen and London.

C3's Metro database of more than 100 cities in 3D is available as a platform for new social and commercial applications serving local search, real estate, travel, tourism, media, and entertainment, as well as uses in civil government, utilities, and telecommunications.

The 20 C3 cities now available on Nokia Ovi Maps include Barcelona, Boston, Chicago, Copenhagen, Florence, Helsinki, Las Vegas, London, Los Angeles, Madrid, Miami, Milan, New York, Oslo, Prague, San Francisco, Stockholm, Toronto, Venice and Vienna. More cities will be added shortly.
