

New GPS Photo Mapping Product

GeoSpatial Experts (CO, USA) has unveiled a new GPS photo mapping product bundle that includes a Pentax digital camera, Garmin handheld GPS receiver and the GeoSpatial Experts GPS-Photo Link software.

The Pentax-Garmin package is the third GPS-Photo Link mapping product bundle offered by GeoSpatial Experts. GeoSpatial Experts is the developer of GPS-Photo Link, a digital image mapping software that saves time and money by automatically linking digital photographic images to GPS location data in the GIS environment. GPS-Photo Link creates web pages in which the watermarked photographs are integrated with satellite imagery, street maps, and any other GIS-based mapping layer.
