

# New Lasers from Pentax

Pentax (Belgium) have announced the introduction of their new PLP-600 range of Lasers which are aimed at the general construction market. Based on the successful PLP-50 and PLP-5H ranges, the new PLP-600 Lasers have been designed with high performance features and a competitive price.

There are 4 models in the range comprising of PLP-601R, PLP-602R, PLP-601 and PLP-602. The PLP-601R and PLP-602R are supplied with ni-mh battery packs and chargers whilst the PLP-601 and PLP-602 models are powered by 4x D cell alkaline batteries. The PLP-601R and PLP-601 provide 10mm accuracy with a 200m working range whereas the PLP-602R and PLP-602 have an accuracy of 12mm and a 120m range.

All models are automatically self levelling within a +/- 10% range and the Pentax compensator system ensures that levelling is achieved quickly and accurately.

The Pentax PLP-600 range benefits from the following features:

- Automatic Self Leveling
- IPX6 Water Protection enabling use under the harshest conditions
- sturdy and rugged design
- supplied complete with LS-6 Receiver and LA-6 Bracket
- manual mode enabling basic slope measurements to be made
- auto beam shut off if knocked out of alignment to prevent errors in measurement
- choice of models to meet all requirements and budgets.

The Pentax PLP-600 range of lasers will be available from December 2005.
