

NovAtel Launches DL-V3 Enclosure

NovAtel (Canada) has released its DL-V3, a rugged, enclosure housing GPS/GNSS OEMV-3 engine. The DL-V3 features Bluetooth for wireless connectivity and Ethernet for remote access, as well as a removable Compact Flash card for data security and portability.

Powered by the OEMV-3 engine, the DL-V3 is capable of tracking both GPS en Glonass, and the future GPS L5 signals. It delivered sub-meter positioning using OmniSTAR or Canada-wide DGPS L-Band correction services, The DL-V3 also features patented PAC multipath mitigation technology with enhanced Vision functionality planned for future firmware updates.
