

# OEM Version of Pinwheel GNSS Antenna

NovAtel, Canada, has unveiled the Pinwheel OEM at ION 2012 in Nashville, Tennessee, USA. The Pinwheel OEM is a GNSS antenna module that can be easily integrated into end-user GNSS positioning products.

With a form factor of 143 mm x 30 mm, the antenna module receives GPS L1/L2, GLONASS L1/L2 and L-Band signals for positioning reliability and availability. The Pinwheel technology provides increased multi-path rejection and phase centre stability.

The Pinwheel OEM will be available for order starting December 2012, with product shipment commencing January 2013.
