

Omnistar Service Upgrade

Omnistar GNSS Service will be represented at the INTERGEO in Cologne, Germany, in hall 11.1; Stand 1F.108. Amongst others there will be the introduction of service upgrades including Glonass/G2 and the Internet Delivery Service (NTRIP).

Russia has again launched three Glonass satellites in September 2010 bringing the total number of useable Glonass satellites for OmniSTAR Glonass Service to 22. Another launch of 3 Glonass satellites is planned for December, bringing the total number of Glonass satellites to 25.

Also our website now offers all new end-users the possibility for activating their receiver online with a free three-day test signal.
