

# Orbit GIS X

Orbit GeoSpatial Technologies launched Orbit GIS X, the new generation desktop GIS. Orbit GIS X is the new engine for the Orbit GT portfolio. Being specialised in government, public safety and mapping industry solutions, the release of Orbit GIS X will lower the threshold for many GIS users to come.

"We are very excited to announce this release. Orbit GIS X will show GIS users around the world that GIS can be easy to use, yet powerful at the same time", says Peter Bonne, VP Business Development and senior product manager at Orbit GT. "Orbit GIS X offers an innovating way for users to explore, share, search and edit private and corporate content. With Orbit GIS X, we also launch ta powerful host based on our new GIS kernel and opening hundreds of API's for the development of extensions."
