

Orbit GT Updates Mobile Mapping Solutions

Orbit GT has released the 11.2.4 update for several products from its Mobile Mapping portfolio. A couple of leading solutions have been upgraded with new tools, core improvements and fixes. The updated solutions are: Orbit MM Feature Extraction basic, Orbit MM Asset Inventory Bundle (stand-alone) and Orbit MM Explorer.

Each product is immediately [available for download](#). Product owners can download the upgrade for free if subscribed to the software maintenance programme.
