

Over 3,000 Expected at MundoGEO Connect

MundoGEO Group is promoting MundoGEO#Connect event to be held in São Paulo, Brazil from 14th to 16th June. The organisation expects to receive more than 3.000 professionals, including specialists, decision makers, data producers, application developers, content providers and users of geoinformation in general.

The trade show of the event has already confirmed the presence of the main Brazilian companies, including the local distributors of Spot Image, DigitalGlobe, Hexagon, Trimble, Google, Topcon, Erdas, Logica, Mapinfo, Radarsat, Spectra, Garmin, Navteq, Nikon among others.

There will be six seminars, three courses, many workshops and other events happening simultaneously. According to Emerson Zanon Granemann, director and founder of MundoGEO Group and coordinator of the event, the contents of the presentations and debates are based on a great research that was made in the geocommunity. All the presentations will be interactive allowing people to participate live or using the internet. Some parts of the event will be broadcasted by webinars and commented by Twitter.

The geo-technology subjects of the presentations are: Spatial Data Infrastructure (SDI), Data Quality, 3D Mapping, Remote Sensing, Photogrammetry, Radar and Laser, GIS, Land Survey, Geoweb, GNSS and LBS. The subjects of the application areas bring the economic growth of Brazil nowadays concerning infrastructure/utilities, civil defence, environmental disasters, mining, oil and gas, environment, sustainability, agribusiness, forestry and federal, state and local government.
