

# PhoToPlan v4.0 Now Available

kubit (Germany) has released PhoToPlan version 4.0. PhoToPlan is a software that allows the rectification of digital or digitalised photos and plans to scale directly in AutoCAD and AutoCAD LT.

The rectification is carried out with reference values that are taken at the photographed object. With PhoToPlan photos and objects can be rectified in such a way that they can afterwards be used as image plans. In CAD programs area and linear dimensions can be taken directly from the corrected photo. PhoToPlan is fully compatible with AutoCAD 2007 and AutoCAD 2007 LT, and version 4 is available in a German and an English version.

PhoToPlan can be tested in a four week trial period free of charge.
