

# Prague Geo Summit Focuses on Education

On Saturday 1 June and Sunday 2 June the Prague Google Geo Summit is taking place in the International School of Prague, Czech Republic. This event is a professional development experience designed to help educators get the most from Google's geo products and technologies. The summit focuses on the use of Google Earth and Google Maps in education and attendees are a mixture of directors, administrators, geography teachers and other teachers.

During the intensive two-day event participants get hands-on experience. Various sessions are on the programme, lead by some of world's leading Google Geo experts. Attendees will learn about innovative instructional strategies and receive resources to share with colleagues. The Google Geo Education team hopes this event will empower

educators to bring the world's geographic information to students in a compelling, fresh, and fun way.

For more information on the Prague Geo Summit see the organisation's [website](#).
