

Resolving Boundary Disputes

Aerial survey specialist Bluesky has launched a new way to obtain irrefutable evidence for use in boundary disputes and other land based disputes or studies. The OldAerialPhotos Photopack contains two digital image files; one archive aerial photograph of a location in the past and a corresponding image from the most recent aerial survey.

The Photopack also contains A4 printed versions of the aerial photos, a certificate of authenticity, a copy of the archive search details and the supporting flight report from the archive scan (where available). The OldAerialPhotos Photopacks offers savings of 30% against the list price of all items contained and is the ideal resource for site investigation, boundary disputes or local studies.
