

Riegl Wins 2014 MundoGEO#Connect Award

Riegl was honoured to accept the 2014 MundoGEO#Connect Award for Most Memorable Brand of Terrestrial Laser Scanner at the MundoGEO#Connect Latin America 2014 Conference and Trade Fair of Geomatics and Geospatial Solutions, which took place at the Frei Caneca Convention Center in São Paulo, Brazil, on 8 May 2014.

The price was received by Roger Neves, CEO of Riegl's partner in Brazil, [CPE Equipamentos Topograficos](#). CPE is proud to be the Riegl dealer in Brazil and is very pleased to see Riegl getting deserved market recognition, said Roger Neves.

Riegl is very pleased to receive the MundoGeo award for the most memorable brand, which is an acknowledgment of the outstanding qualities of the VZ-Line terrestrial laser

scanners, commented Johannes Riegl Jr., Riegl's chief marketing officer.

Riegl terrestrial laser scanners provide detailed and highly accurate 3D data rapidly and efficiently. The applications for the scanners are wide ranging and include: topography, mining, as-built surveying, architecture, archaeology, monitoring, civil engineering, city modelling, and others. All Riegl terrestrial laser scanners are high-performance and fully portable instruments, tested at strict standards to ensure reliable performance, also under the most demanding conditions.

Riegl is widely represented in South America through strong distribution partners in Argentina, Bolivia, Chile, Ecuador and Peru in addition to Brazil.
