

RMIB Geoscience BV Acquired by East View Cartographic

East View Cartographic (MN, USA) has announced that it has completed the acquisition of all Dutch mapseller RMIB Geosciences BV. The move strengthens EVC's commitment to serving its growing European clientele through its own Dutch office, East View Information Services BV, based in Arnhem, The Netherlands.

With the RMIB Geosciences acquisition, EVC has taken possession of a large number of rare and valuable maps and atlases, and in the coming weeks these materials will be described and made available by EVC. Many of these items are now virtually impossible to obtain because they were produced in low press runs and come from some of the world's most closed and isolated countries.
