# Safe Software Announces Updates to FME Suite

Safe Software Inc. (Canada) has announced the availability of FME Suite 2005. FME Suite 2005 implements over 1500 user-requested enhancements, resulting in over 20 new formats, and 26 new transformers. With this release, the total number of FME-supported formats has now surpassed 150. FME Suite 2005 includes a technology preview of the upcoming FME raster support, and features 15 raster formats, including Oracle 10g GeoRaster and ArcSDE raster. General performance improvements and FME Workbench enhancements such as compound transformers and bookmarks were also added to help users manage ever-increasing data volumes and more complex transformations.
