

# Satlab Geosolutions Expands with New Americas Office

Swedish survey and GIS equipment maker Satlab Geosolutions has announced its formal expansion into the US and Americas with the creation of a new sister company: Satlab Geosolutions (USA) Inc., based in Scottsdale, Arizona. Setting up a formal base of operations in the US will allow Satlab to better service its clients and expand its customer base in the US, Canada, Mexico and Latin America.

Satlab Geosolutions (USA) is also pleased to announce the appointment of Phil Gabriel as managing director. As past president of Hemisphere GNSS, Gabriel brings to the team his many years of experience in the survey, GIS, GNSS, machine control, marine and navigation industries.

The US location will sell, support and service the new product lineup being introduced at Intergeo in Berlin, Germany on 7 October. Satlab is currently seeking dealers to help expand its business throughout the Americas.

The addition of a US office is an exciting next step for Satlab, after successful expansion into Turkey and the Czech Republic in the last few years, explained Björn Ågårdh, CEO of Satlab Geosolutions. The company's products have been well received and continue to perform extremely well, added Birol Güçlüer, CTO and partner of Satlab.

Satlab invites survey and GIS dealers to meet the expanded team at Intergeo on 7-9 October in Berlin, where it will be introducing several new models of its popular receivers and handhelds.
