

Second Edition of Commercial UAV Show in Bigger Venue

On 20-21 October 2015 the UAV community will gather in London, UK, where the Commercial UAV Show premium conference brings end users from a range of industries together in one room to evaluate how UAVs can deliver cost and operational efficiencies. The event is the right occasion to meet organisations currently using UAVs successfully alongside the companies supplying the latest technology so that visitors can decide where and how their organisations can benefit most.

The premium conference will enable visitors to:

- Analyse the current and future impact of UAVs in various commercial sectors with specific end users showcases

- Hear in-depth technical presentation on the most significant new UAV technologies including: Data capture and analysis, flight control and navigation, payload technology, power systems and interconnected robotics
- Join the debate and help influence regulators like the CAA and FAA as they map out the future of UAV regulation

The Commercial UAV Show exhibition brings together 3,000 people including UAV end users, platform manufacturers and component suppliers who will benefit from seeing the latest technology displayed across 100+ stands and put to the test in the demo zone. Three on-floor seminar theatres will host technical talks from the most innovative technology suppliers and interesting end users.

The free-to-attend exhibition will enable visitors to:

- Get up close and personal with the latest UAV platforms displayed by industry leaders like Aerialtronics, Textron, Airware, UTC Aerospace and BAE Systems
- See live demonstrations of the most innovative UAVs at the demo zone
- See the full range of available commercial UAV technology at 100+ exhibition stands
- Attend 2 days' worth of seminar content taking place over 3 on-floor theatres
- Hear seminar presentations from the full UAV value chain including end users, platform manufactures, component and service suppliers
- Hear case studies from the most interesting UAV end users in Search and Rescue, Agriculture, Oil and Gas, Surveying, Policing and Infrastructure
- Visit 20 end user exhibition stands in the End User Zone demonstrating the latest applications
- Network with 3,000 people from the commercial UAV industry
