

# Share Your Experiences of Challenging Survey Projects!

Have you been involved in a challenging surveying project, and would you be willing to share details of your experience with other *GIM International* readers? The diverse nature of surveying – and its relevance for so many aspects of the future advancement of society – means that industry professionals work in all kinds of environments, often under very difficult circumstances or with spectacular

results. If you have an impressive or informative story to tell about how you and your surveying team overcame challenging conditions, Wim van Wegen is keen to hear from you!

The forthcoming 'Prestigious Projects' issue of *GIM International* is the ideal edition in which to showcase your challenging project to our worldwide audience. When sending us details of your project, please also include some photos that capture the demanding nature of the task at hand. We look forward to hearing from you!

Contact [Wim van Wegen](#), head of content at *GIM International*, if you would like to showcase a unique survey project or if you're keen to share your experience of mapping the environment under challenging conditions.

Iceland's dynamic geodetic situation can be challenging for surveyors, but it also presents opportunities for interesting and exciting projects.
